THE BIG 3 IN ORTHODONTICS - Clever extraction, easy anchorage and effective space closure

You want to avoid extractions - of course! But sometimes that is simply impossible. Does it always have to be four premolars? No! Rather, it is crucial to choose intelligently. Important criteria are the individual patient and the required anchorage.

The LeanOrthodontics® extraction rules allow you to immediately make the best extraction decision quickly and safely and while selecting the best anchorage at the same time. Ingeniously simple. Whether for Class I, II, III, vertical problems or asymmetries. Which anchorage method is the best? How do you apply it reproducibly and safely? Fortunately, there are miniimplants! But don't let the noise of some providers blind you. Rather, learn why and where which miniimplants should be used. Dr. Baxmann shows you how to combine them perfectly with appliances such as fixed Straight-wire Appliances and even Aligners. From now on you will no longer be dependent on external surgeons, instead you learn how to confidently insert them yourself. You know the feeling that it seems to take forever to close gaps? You are not alone. Closing gaps efficiently and effectively is one of the deciding factors when it comes to overall treatment time and unnecessary patient and practitioner frustration! With the techniques discussed here, two-year and longer fixed appliance treatments are finally history.

Powerchain, Niti-Coil or loop arches. Everything has its justification and from now on you know what is best and when. This way you will achieve better results faster than ever before - it can be so easy. Let yourself be inspired by the inspiring and humorous speaker no. 1. Orthodontic evidence meets extensive experience from over 15,000 treated patients. You will feel in every minute of the course how much fun orthodontics can be - if you know how to do it!

Welcome to the 21st century of orthodontics. Welcome to Dr. Baxmann's LeanOrthodontics®."

2025 Update in TADs

Let's discuss an update to decide when to use them, when not to use them, which are the best insertion sites and why. Learn to insert and remove quickly and safely and avoid unnecessary failures. Take home a streamlined, easy-to-understand and successful concept that covers everything from education, anaesthesia, insertion and correct connection to the fixed appliance or aligner to removal.

After the Theory, insert them yourself in multiple clinical insertion sites with real screws in typodonts. Get a very good feeling for TADs in real life and become ready to insert them in your clinic in your patients from the very next day.

The most important applications at a glance:

- Maximum anchorage in the upper and lower jaw
- Clever distalisation in the upper and lower jaw, without complex and expensive additional appliances
- IZC technique and buccal shelf method
- Gummy smile treatment with mini implants
- Class II, III, deep bite and open bite corrections
- Using mini-implants and aligners together
- Pre-prosthetics, non-implants and special cases
- Master of disaster: avoid implant loss and damage to neighbouring structures

INCLUDING EXTENSIVE HANDS ON TRAINING
ON TYPODONTS WITH REAL SCREWS.

Case Planning Study Club 2025

"One reason why I developed the concept LeanOrthodontics® is that I kept noticing in my courses how much time and energy is wasted on case planning and treatment decisions and how much frustration that can cause. Then I just had to change that!"

-Dr. Martin Baxmann,
Programme Director Orthodontics,
DTMD University-

For this course, you bring your own cases. Yes, you understand it right. Bring your cases! All the cases that are giving you a headache or that you simply have questions about or find challenging. We are going to solve them together, live, during the course. Then you will get to know the core of LeanOrthodontics®, the ABCD-System® and the Baxmann Keys®. We will use these to break down cases in the group down to the smallest detail.

Once you have understood this concept, you will be able to solve any case in a variety of ways. In a much shorter time. And with a really good feeling!

Expand your orthodontic knowledge and learn efficient, state of the art, fast and evidence-based treatment planning with an enthusiastic speaker with a very good sense of humour.

This one-day course is for doctors. Whether you are a beginner or a professional, it is worthwhile for anyone who wants to get better.

dr Martin Baxmann

Dr. Baxmann is a distinguished speaker, teacher, multiple Amazon best-selling author, entrepreneur, and orthodontist. He is the founder and CEO of Orthodentix®, a prominent orthodontic practice group, MyOrthoLab®-Experts in Orthodontics, a recognized orthodontic specialty laboratory, PlusSmile®, a Doctor4Doctor Aligner Brand, and MyOrthoBooks, a well-regarded orthodontic book publishing company. Dr. Baxmann earned his Dentistry degree at the University of Göttingen, Germany, and pursued postgraduate studies in Orthodontics at the Guys', King's, and St. Thomas' Dental Institute in London, UK. He received the Dr. med. dent. degree at the University of Bonn, Germany, and served as a visiting Lecturer from 2009 to 2017 in the Master of Science Program at the University of Seville, Spain. 2022 he has been appointed the program director for the international postgraduate Master of Science in Orthodontics program at DTMD University, Luxembourg. With Dr. Baxmann the DTMD provides now MSc Courses in Luxembourg, Warsaw and Dubai. Acknowledged for his contributions, Dr. Baxmann received the international HealthCare Award and Gamechangers Award from CEO Today magazine in 2018, along with the European Business Award in 2019. In 2021, he joined the scientific advisory board of several dental companies e.g. of a leading European Aligner provider. With over 18 years of international lecturing experience, Dr. Baxmann is recognized for his year-round curriculum, presenting an evidence-based orthodontic approach known as LeanOrthodontics®. HE also offers a wide range of Online Courses. Furthermore he continually develops orthodontic products and apps to support this methodology, owning 13 registered product trademarks. As an editor and author, Dr. Baxmann has led publications such as "Fixed Appliances for Class II Therapy" (Quintessenz Publishing) and the "LeanOrthodontics®" book series (MyOrthoBooks Publishing). Eight of his books have achieved Amazon bestseller status. He also has published numerous research articles in peer reviewed journals and contributed book chapters to various orthodontic textbooks. Dr. Baxmann hosts the LeanOrthodontics® podcast, a well-received platform on orthodontics and practice management in german language with over 5,000 subscribers. His social media presence has attracted a global following of more than 25,000 followers.
